

## Genius Relativity

Genius  
to a genius  
is just the thoughts of every day,  
and does not really understand  
when others cannot comprehend  
the rather simple things it has to say.

Masterpieces  
to a master  
are only what they ought to be,  
and if one labors long enough  
to build according to that plan  
the truth undrapes itself for us to see.

Even our most modest thoughts  
could masquerade as genius  
to less brain-bound beasts than you or me.  
But now (to think a slightly different way)  
imagine creatures out on other worlds  
who'd find our fondest masterworks  
to be their children's play.
